

KEY FINDING

Across major markets in Uganda and the United Republic of Tanzania, only a small share of analysed secondhand clothing items were deemed non-rewearable, offering a different perspective on narratives of low-quality or waste imports.

SECONDHAND CLOTHING IMPORTS • QUALITY AND COMPOSITION ANALYSIS

NON-REWEARABLE ITEMS • DISTRIBUTION ACROSS MARKETS

* Rags, though non-rewearable, retain value unlike textile waste and are commonly used in industrial and commercial cleaning.

ESTIMATED TEXTILE WASTE SHARE PER BALE, BASED ON BALE COMPOSITION ANALYSIS *

* Share based on bale composition analysis of clothing subcategories by grade.
